Please find below and/or attached an Office communication concerning this application or proceeding.

If NO period for reply is specified above, the maximum statutory period will apply and will expire 6 MONTHS from the mailing date of this communication.

Office Action Summary	Application No. 10/595,556	Applicant(s) NISSL, THOMAS	
	Examiner Katherine M. Dowe	Art Unit 3734	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Specification

2. The disclosure is objected to because of the following informalities: Reference to parent applications PCT/DE04/02253 and DE103 52 874.1 must be included in the first paragraph of the specification.

Appropriate correction is required.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 6, 2, and 4 are rejected under 35 U.S.C. 102(b) as being anticipated by Richter (US 5,807,404). Regarding claim 6, Richter discloses an expandable stent comprising a tubular support frame defining a longitudinal axis (Fig 4) and including a plurality of ring segments (col 2, lines 52-57), as shown below in Fig 11, arranged in succession in a direction of the longitudinal axis and formed by struts which are joined

continuously in a wavelike manner in a circumferential direction of the support frame.

The struts are curved arcuately and merge together to form U-shaped arcuate sections.

First and second connectors link adjacent ring segments. The connectors alternate in the circumferential direction and in the direction of the longitudinal axis and are formed with a U-shaped compensating sections pointed in the same circumferential direction.

The first connectors are longer in length than the second connectors and curved in the same circumferential direction as the struts (see Fig 11 below).

Regarding claim 2, Richter discloses the ring segments define wave crests and wave valleys, which confront one another (see Fig 11 below).

Regarding claim 4, Richter discloses the connectors arranged successively in the longitudinal axis are linked to the U-shaped arcuate sections of the struts by connections, where the first and second connections confront one another (see Fig 11 below).

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure: WO 01/89417 (Yoon) and US 6,416,539 (Hassdenteufel)
